CONTENTS

Chapter 1	9
General introduction	
Chapter 2	17
Cancer treatment induced metabolic syndrome: Improving outcome with lifestyle	
Chapter 3	35
Single nucleotide polymorphism in the 5- α -reductase gene (SRD5A2) is associated with increased prevalence of metabolic syndrome in chemotherapy-treated testicular cancer survivors	
Chapter 4	49
Optimal timing of a tailored physical exercise program during cancer chemotherapy to reduce long-term cardiovascular morbidity - ACT trial: design and a preliminary report on cardiorespiratory fitness and vascular markers	
Chapter 5	71
Potential genetic predisposition for anthracycline-associated cardiomyopathy in families with dilated cardiomyopathy	
Chapter 6	85
Bleomycin-induced pulmonary changes on restaging computed tomography scans in two thirds of testicular cancer patients show no correlation with fibrosis markers	
Chapter 7	101
Variation in the HFE gene is associated with the development of bleomycin-induced pulmonary toxicity in testicular cancer patients	
Chapter 8	115
Summary, discussion and future perspectives	
Chapter 9	125
Nederlandse samenvatting (Dutch summary)	
Supplemental files	131
Dankwoord (Acknowledgements)	137
